MILITARY EQUIPMENT

M917 Dump Body

The M917 Dump Body is the primary vehicle in engineer units for earth, rock, aggregate, and construction materials.

M917A-3 Proposed

M917A-2

M917 Facts:

- Crysteel, with Freightliner Trucks, has produced and fielded over 1,100 units since 1997
- Available with or without Crysteel's Material Control Gate (see below)
- Proposed M917 A-3 design includes the High 'N Slide tailgate that has High-Lift and metering capabilities

High 'N Slide Tailgate

Traditional

High Lift

Sliding

- 3-in-1 Tailgate Functions
- Most versatile tailgate in the industry

MCS Gate

Adjustable opening, independently controlled automatic metering gates that allow you to direct material where you need it from the safety of the cab or sides of tailgate.

FMTV Dump Body

The FMTV with 10-ton Crysteel dump and Roller Combo hoist provides the payload capacity and durability to support military personnel in any construction mission.

FMTV Facts:

- Crysteel heavily involved in initial design and testing of 10-ton version
- Crysteel Manufacturing has produced over 3,000 FMTV Dump Bodies and Hoists for the US Military through Stewart & Stevenson, BAE Systems and Oshkosh Defense.

HIMARS RST

HIMARS System Cargo Trailer, 17' Long, 12,500 lb capacity

HIMARS RST Facts:

- Designed and produced trailers for Oshkosh Defense

PLS Truck with 12 CU-Yd Dump Body

PLS with Engineer Mission Module is capable of hauling 12 cubic yards of material. Trailer with matching 8 x 20 dump body doubles its hauling capability.

PLS Dump Body & Trailer Facts:

- Designed and produced PLS Dump Body module and trailers for Oshkosh Defense

MTVR Dump Body

- Involved with design and testing of Initial MTVR Dump Body Variant
